CLEAR BOWL FUEL FILTERS

COMPLETE WITH ELEMENT

Built for gravity and pump applications

Cast aluminium head with 1" BSP threads for easy fitting into pre-existing systems

Clear bowl allows fuel to be seen while travelling through, allowing you to easily identify just how dirty or clean your fuel is, while also allowing you to spot any water in your system

Bowl easily unscrews from head to allow quick replacement of old elements

Fuel resistant Polycarbonate bowl

- **10 micron** paper element
- 1" female BSP inlet/outlet
- **60 LPM** maximum flow rate
- Up to **100 PSI** working pressure
- **Drain cock** for excess fluid
- Clear bowl for **visual checking** of fluid
- Removable head
- Replaceable **element**
- For use with **petrol or diesel**

EFHD HIGH FLOW FUEL FILTERS

MADE IN USA

Suitable for gravity flow or pump applications with bulk storage tanks in many industrial applications.

Mounting bolt holes on 1" BSP head

Easy spin/off canister design allows for easy replacement of old/ damaged canisters

Large body canisters for longer overall element life and higher flow allowance

- The EFHD series filter enables flows up to **151 LPM** with Working Pressure max. 50 PSI.
- The **steel canister element** is easy and economical to replace with a large surface area for maximum efficiency.
- Suitable for **diesel and unleaded petrol** with specialized filters for ethanol blends up to E15 and Biodiesel up to B20
